TESTIMONIAL

Dr. Martina Scheer
Management Board for tourism
ADAC Saarland e.V.

Picture: ADAC Saarland, Ann-Iren Ossenbrink

“ The ADAC Saarland has been intensively dedicated to the topic of cycling for some time. The service, but also the safety aspect is extremely important, as with all ADAC products. In comparison, the LEVELO repair station from Veyhl is convincing because it is equipped with high-quality and robust tools. The pump, for example, is made of stainless steel and is therefore weatherproof. The station also scores points when it comes to handling: The manufacturer has put a lot of thoughts into user-friendliness and professional mounts. The service point is also an eye-catcher: the yellow colour scheme and the ADAC branding with helpful information have resulted in a lot of positive feedback from satisfied cyclists. On top of this comes the professional and competent support provided by Veyhl. **The ADAC Saarland would therefore always choose the LEVELO repair stations.** ”
